NGORONGORO

UNESCO WORLD HERITAGE SITE: Natural and Cultural

With abundant wildlife coexisting with semi-nomadic Maasai. Noted as an Archaeological hub for evidence of human evolution and human-environment dynamics, including early hominid footprints dating back 3.6 million years. The Area includes the spectacular Ngorongoro Crater, the world's largest caldera.

SERENGETI

UNESCO WORLD HERITAGE SITE: Natural

The vast plains of the Serengeti comprise 1.5 million ha of savannah. The annual migration to permanent water holes of vast heards of herbivores (wildebeest, gazelles and zebras), followed by their predators, is one of the most impressive natural events in the world.
